Section B. Subject Index

Aerosols
GCMs used to simulate climate response to soil dust aerosols, 3247
influence of absorbing aerosols on the solar surface radiation budget, 5
Agricultural influences, ENSO influences on agriculture in the southeastern United States, 404
Air–sea interactions
biennial oscillation in the equatorial Indian and far western Pacific Ocean, 987
coupled modes of the warm pool climate systems, 2116
variability of air–sea interactions over the Indian Ocean, 1859
w.r.t. ocean model study in the North Atlantic, 2310
Albedo biases, plane parallel albedo biases from satellite observations, 919, 933
Algorithms, EOF-based linear prediction algorithm, 3046
Amazon air temperatures, surface air temperature variations in the region, 1105
Analytic solutions, destabilization of the thermohaline circulation by atmospheric transport, 1803
Annual cycles
observed mean annual cycle of moisture budgets over central United States, 2180
SST in the eastern tropical Pacific, in an ocean GCM, 777
Annual timescales, high- and low-frequency intraseasonal variance of OLR, 968
Antarctic Circumpolar Wave, coupled ocean–atmosphere GCM, 1659
Antarctic cloud properties, radiative properties and GCM climate simulations, 447
Antarctic precipitation, spatial and temporal variability from atmospheric methods, 334
Anthropogenic signal detection, potential effect of GCM uncertainties on anthropogenic signal detection, 659
Arctic
cloud–radiation–temperature associations, 3030
new monthly climatology of global radiation, 121
temporal variability of the energy balance of thick pack ice, 313
Arctic precipitation, model results and observational estimates of evaporation and, 72
Atmosphere–ocean interaction
North Atlantic near-surface climate variability, 1615
seasonality of large-scale atmosphere–ocean interaction over North Pacific, 2473
Atmospheric moisture, convergence and disposal of energy and moisture over Antarctic polar cap, 1703
Australian jet stream, 6-yr climatology for the Australian–South Pacific jet stream, 283
Barotropic atmosphere, empirical model of barotropic atmosphere dynamics, tropical forcing, 2645
Bayesian aspects, detecting climate signals, 640
Biennnial oscillation, dynamics in the equatorial Indian and far western Pacific Oceans, 987
Boundary layer processes, effects of vegetation on diurnal cycles of temperature and humidity, 2995
Boundary layer thermals, western Pacific warm pool region sensitivity to convective triggering, 1553
Brazilian precipitation, Pacific and Atlantic SST related to northeast Brazil monthly precipitation, 551
Breakpoint data, hidden Markov model for rainfall, 42
Bulk aerodynamic algorithms, intercomparison of bulk aerodynamic algorithms for sea surface fluxes, 2628
California precipitation, tropical influences, 412
Canadian temperature series, technique for identification of inhomgeneities in, 1094
Canopies, interactive canopies for a climate model, 2823
Carbon monoxide doubling, changes in the extremes of GCM simulated climate with, 2200
CARDS, subset from the Comprehensive Aerological Reference Data Set, 272
Central United States, subseasonal variations in warm-season moisture transport and precipitation, 2530
Chaotic systems, example of a simple, ordered subsystem of a complex chaotic system, 2455

Circulation
relative impacts of snow and SST temperature anomalies, 2837
sea ice effect on the sensitivity of the thermohaline circulation, 2789
Cirrus clouds, accurate parameterization of the IR radiative properties, 2223
Classifying ENSO, U.S. winter cyclone frequency patterns associated with three ENSO parameters, 2152
Clear-sky greenhouse effect, 15-yr simulation using ECMWF reanalyses and comparisons with ERBE, 690
Climate
climatic changes w.r.t. CAPE variability in current climate, 1997
variability via coupled ocean–atmosphere general circulation model, 1906
Climate change
anomalous atmospheric hydrologic processes associated with ENSO, 800
climate change and the middle atmosphere, double carbon dioxide, 876
model simulation and relevance to climate change detection, 2743
scale-dependent detection of climate change, 3282
westward-intensified decadal change in North Pacific gyre-scale circulation, 3112
Climate drift
drift in multicentury integrations of the NCAR CSM, 1455
sensitivity of climate drift to parameterizations in a coupled model, 1633
Climate extremes, changes in the extremes of GCM-simulated climate with CO_2 doubling, 2200
Climate forcing, changing solar radiation, 3069
Climate models
15-yr simulation of clear-sky effect using ECMWF reanalyses and with ERBE, 690
accurate parameterization of the IR radiative properties of cirrus cloud, 2223
biennial oscillation in the equatorial Indian and far western Pacific Ocean, 987
coupled biosphere–atmosphere model for climate change due to land surface, 1749
drift in multicentury integrations, 1455
effect of surface sublayer on surface skin temperature and fluxes, 537
effects of horizontal resolution and diffusion on thermohaline variability, 709
energy budget of the NCAR Community Climate Model version 3, 1151
global climate system and the Indonesian throughflow, 676
Hadley Centre's and wintertime in the North Pacific–American sector, 1073
influence of SST and ground wetness on Asian summer monsoon, 3230
interactive canopies for a climate model, 2823
mixed layer modeling in the tropical western Pacific and Indian Oceans, 2668
NCAR Climate System Model, version 1, 1115
polar climate simulation with the NCAR Community Climate Model version 3, 1270
relation of atmospheric low-frequency variability to SST variability, 1386
sensitivity of climate drift to parameterizations in a coupled model, 1633
simulation of quasi-stationary waves in the Southern Hemisphere with, 1405
statistical and model-based techniques for estimating local variations, 735
surface radiation budget over oceans and continents, 1951
temperature dependence of low-cloud optical thickness in the GISS GCM, 3268
very high-resolution regional climate simulations, 3204
Climate of Puerto Rico, ENSO and North Atlantic-Oscillation control of climate, 2713
Climate response, CO_2- and aerosol-induced changes in vertically integrated zonal budget, 625
Climate signals, detecting climate signals, Bayesian aspects, 640
Climate simulations
annual cycle of SST sensitivity to sunlight penetration, 1932
Antarctic cloud radiative properties and GCM climate simulations, 447
changes in the extremes of GCM simulated climate with CO_2 doubling, 2200
GCMs used to simulate climate response to soil dust aerosols, 3247
using common principal components for comparing GCM simulations, 816
w.r.t. convective parameterization as used in NCAR CCM3 model, 2097
Climate studies, use of radiosonde temperature data in climate studies, 1002
Climate System Model
application of a third-order upwind scheme in the NCAR ocean model, 1487
Asian–Australian monsoon and ENSO in the NCAR Climate System Model, 1356
comparison of the atmospheric circulation simulated by CCM3 and CSM1, 1327
dynamical simulation of the NCAR Community Climate Model version 3, 1207
energy budget of the NCAR Community Climate Model version 3, 1151
global ocean component of the NCAR Climate System Model, 1287
hydrologic and thermodynamic characteristics of NCAR's CCM3, 1179
land surface model coupled to the NCAR Community Climate Model version 3, 1307
meridional ocean energy transport as simulated by the NCAR CCM3, 1237
National Center for Atmospheric Research Community ClimateModel 3, 1131
NCAR Climate System Model, version 1, 1115
polar climate simulation with the NCAR Community Climate Model version 3, 1270
polar radiation budgets of the NCAR Community Climate Model version 3, 1246
sea ice and polar climate in the NCAR Climate System Model, 1472
simulation of quasi-stationary waves in the Southern Hemisphere with, 1405
simulation of the tropical Pacific warm pool with the NCAR, 1342
surface ocean fluxes and water-mass transformation rates in coupled model, 1420
wind-driven circulation of coupled and uncoupled ocean model, 1442
Climate types, does a monsoon climate exist over South America? 1020
Climate variability
atmosphere–ocean interaction, North Atlantic near-surface climate, 1615
climate variations and changes in mass of three glaciers, 2161
Climatological datasets, subset from the Comprehensive Aerological Reference Data Set (CARDS), 272
Climatological trends, recent increasing trend in streamflow of rivers in South America, 2858

Clouds
arctic cloud–radiation–temperature associations, 3030
interdecadal variations in marine low clouds, 2910
model versus satellite obs w.r.t. cloud fraction/height and outgoing radiation, 1976
optical depth of overcast cloud based on surface and satellite data, 2980
seasonal and interannual variations in stratiform and convective clouds, 2922
temperature dependence of low-cloud optical thickness in the GISS GCM, 3268
Cloud albedo, global survey of the relationships of liquid water path, droplet size and, 1516
Cloud ensemble models, parameterization for cloud overlapping and short-wave single scattering, 202
Cloud liquid water, sensitivity of simulated climate to a diagnostic formulated for, 1497
Cloud optical depth, inference of marine stratus cloud optical depths from satellite measurement, 215
Cloud radiative effects, impact of cloud vertical structure on atmospheric circulation in GCMs, 3010
Cloud radiative forcing, interannual variations of summer monsoons, cloud radiative forcing, 1883
Cloud structure, biases in shortwave column absorption in the presence of fractal clouds, 431
Cloud vertical structure, effects on atmospheric circulations in the GISS GCM, 3010
Cold ocean–warm land pattern, model simulation and relevance to climate change detection, 2743
Common principal components, using common principal components for comparing GCM simulations, 816
Community Climate Model
comparison of the CCM3 using diagnosed and predicted condensate, 1587
dynamical simulation of the NCAR Community Climate Model version 3, 1207
hydrologic and thermodynamic characteristics of NCAR's CCM3, 1179
meridional ocean energy transport as simulated by the NCAR CCM3, 1237
National Center for Atmospheric Research Community Climate Model version 3, 1131
Complex chaotic systems, example of a simple, ordered subsystem of a complex chaotic system, 2453, 2460
Composite life cycles, frictional moisture convergence in a composite life cycle of the MJO, 2387
Condensate parameterization, comparison of the CCM3 using diagnosed and predicted condensate, 1587
Conserved variable diagrams, used to define physical processes controlling mean diurnal cycles, 2995
Convection, w.r.t. climate simulation using NCAR CCM3 model, 2097
Convective available potential energy, CAPE variability in current climate overestimating climatic changes, 1997
Convective downdrafts, effects on mean monthly diurnal scales of temperature and humidity, 2995
Coupled models
Antarctic Circumpolar Wave in a coupled ocean–atmosphere GCM, 1659
atmosphere–ocean interaction, North Atlantic near-surface climate, 1615
climate drift in multicentury integrations, 1455
coupled biosphere–atmosphere model for climate change due to land surface, 1749
decadal climate cycle in the North Atlantic Ocean simulated by a coupled GCM, 831
decadal variability in the North Pacific as simulated by, 297
developed to study decadal oscillations, 3309
dynamics of interdecadal variability in coupled ocean–atmosphere models, 602
GCM–mixed layer model simulation of climate response to soil dust aerosols, 3247
generalized inversion of tropical atmosphere–ocean data, 1768
land surface model coupled to the NCAR Community Climate Model version 3, 1307
NCAR Climate System Model, version 1, 1115
relation of atmospheric low-frequency variability to SST variability, 1386
scale-dependent detection of climate change, 3282
sensitivity of climate drift to parameterizations in a coupled model, 1633
simulation with the NCAR Climate System Model, 1342
surface ocean fluxes and water-mass transformation rates in coupled model, 1420
variability of the thermohaline circulation in the GFDL coupled model, 759
Coupled ocean–atmosphere
effects of horizontal resolution and diffusion on thermohaline variability, 709
global climate system and the Indonesian Throughflow, 676
Crop yields, using the Southern Oscillation to forecast wheat and sorghum crop yields, 54
Cyclone climatology, frequency and intensity of Great Lake cyclones, 61
Data, means and trends for shortwave irradiance from archive data, 2042
Data inversion, generalized inversion of tropical atmosphere–ocean data, 1768
Datasets
comparison of the NCEP–NCAR reanalysis with rain gauge and satellite data, 2960
subset from the Comprehensive Aerological Reference Data Set, 272
Decadal change
climate forcing by changing solar radiation, 3069
decadal climate cycle in the North Atlantic Ocean simulated by a coupled GCM, 831
decadal variability of precipitation over western North America, 3148
north–south precipitation pasterns on interannual–decadal timescales, 3095
response to decadal variability in the American southwest, 3128
westward-intensified decadal change in North Pacific gyre-scalecirculation, 3112
Decadal cycles in river flows, interannual and decadal cycles in river flows of southeastern South America, 2570
Decadal oscillations, in a simple coupled model, 3309
Decadal timescales, variability of tropical ocean surface temperature, decadal–multidecadal, 2351
Decadal variability
advective ocean–atmosphere interaction, a stochastic model, and, 165
effects on ENSO predictability and prediction, 2804
in the North Pacific as simulated by hybrid coupled model, 297
model assessment of decadal variability and trends in the tropical Pacific, 2273
Delayed oscillator, locking of El Niño's peak time to the end of the calendar year, 2191
Depth-integrated transport, coupled and uncoupled ocean model of NCAR Climate System Model, 1442
Detecting climate signals
Bayesian aspects, 640
in the surface temperature record, 563

Detection of climate change, scale-dependent detection of climate change, 3282
Discrete random events, technique to measure trends in the frequency of discrete random events, 848
Diurnal cycles, mean monthly observed with PRE-STORM surface data, 2995
Diurnal variations, semidiurnal variations of surface wind over the tropical Pacific Ocean, 1730
Divergence, compared to outgoing longwave radiation and rainfall in the Amazon Basin, 2898
Double carbon dioxide, climate change and the middle atmosphere, double carbon dioxide, 876
Downscaling techniques, statistical and model-based techniques for estimating local variations, 735
Droplet size, global survey of the relationships of liquid water path, cloud albedo and, 1516
Early climatology data, pre-1866 extentions of the Southern Oscillation index, 2325
Eastern United States, subseasonal variations in warm-season moisture transport and precipitation, 2530
East–west SST, contrast role of ocean in the response of tropical climatology to global warming, 864
ECHO model, decadal climate cycle in the North Atlantic Ocean simulated by a coupled GCM, 831
Ecology, response to decadal variability in the American southwest, 3128
Effective radius, study of effective radius parameters for ice clouds, 1793
El Niño
  influence of orography on extratropical response to El Niño events, 716
  locking of peak time to the end of the calendar year, 2191
El Niño–La Niña, associated spatial structure of rainfall anomalies, 2863
El Niño–Southern Oscillation
  annual cycle of PNA seasonal predictability associated with phases of, 3295
  anomalous atmospheric hydrologic processes associated with ENSO, 800
  Asian–Australian monsoon and ENSO in the NCAR Climate System Model, 1356
  associated precipitation anomalies in southern Brazil, 2863
  effects of decadal variability on predictability and prediction, 2804
  ENSO and North Atlantic Oscillation control of climate in Puerto Rico, 2713
  impact, Hadley Centre's model and wintertime in the North Pacific–American sector, 1073
  influences on agriculture in the southeastern United States, 404
  influence on extreme rainfall and temperature frequencies in United States, 3192
  interannual variations of rainfall in Godavari River Basin and, 768
  locking of El Niño's peak time to the end of the calendar year, 2191
  signals, simulations by general circulation models, signals, and systematic errors, 1538
  time–frequency variability and stochastic simulations, 2258
  timescales, high- and low-frequency intraseasonal variance of OLR, 968
  U.S. winter cyclone frequency patterns associated with three parameters, 2152
Empirical models, barotropic atmosphere dynamics, tropical forcing, 2645
Energy balance, temporal variability of the energy balance of thick Arctic pack ice, 313
Energy budget, NCAR Community Climate Model version 3, 1151
Ensemble simulations, assessing potential seasonal predictability with GCM simulation, 109
Equatorial cold tongue, ocean–atmosphere interaction, Walker circulation, and, 189
Equatorial Pacific Ocean, annual cycle of SST sensitivity to sunlight penetration, 1932
Evaporation in the Arctic, model results and observational estimates of Arctic precipitation and, 72
Evolutionary climatology, evolution of the North American monsoon system, 2238
Extended EOF-neural network, neural network-extended EOF approach to forecasting ENSO events, 29
Extratropical response, influence of orography on extratropical response to El Niño events, 716
Extreme events
  ENSO effect on extreme rainfall/temperature frequencies in United States, 3192
  ENSO influence on intraseasonal extreme rainfall and temperature, 1575
  technique to measure trends in the frequency of discrete random events, 848
Extreme phase, relative impacts of snow and SST temperature anomalies on circulation, 2837
Fingerprint patterns, scale-dependent detection of climate change, 3282
Forced modes, reproducible forced modes in AGCM ensemble integrations, 2942
Forcing, impact of surface flux variability on GCM-scale boundary layer, 2774
Forecast models, western Pacific warm pool region sensitivity to convective triggering, 1553
Forecasting ENSO events, neural network-extended EOF approach, 29
General circulation models
  annual cycle of SST in the eastern tropical Pacific, in an ocean GCM, 777
  Antarctic Circumpolar Wave in a coupled ocean–atmosphere GCM, 1659
  Antarctic cloud radiative properties and GCM climate simulations, 447
  climate change and the middle atmosphere, ozone response to double CO_2, 895
  climate forcing by changing solar radiation, 3069
  CO_2- and aerosol-induced changes in vertically integrated zonal budget, 625
  decadal climate cycle in the North Atlantic Ocean simulated by a coupled GCM, 831
  effects of cloud vertical structure on atmospheric circulation, 3010
  GCMs used to simulate climate response to soil dust aerosols, 3247
  interannual variations, external conditions versus internal feedbacks, 501
  parameterization for cloud overlapping and short-wave single-scattering, 202
  potential effect of GCM uncertainties on anthropogenic signal detection, 659
  role of transient disturbances in the pattern dynamics, 523
  signals and systematic errors, 1538
  simulations compared to Amazonian climate data, 2764
  simulations of mid-Holocene climate using an atmospheric, 2607
  simulations of the annual cycle of precipitation over the United States, 1041
  suggested vertical resolution to incorporate cloud vertical structure, 3010
  sulfate aerosol indirect effect and carbon dioxide greenhouse forcing, 1673
  used to study SST effects on ENSO predictability over the PNA region, 3295
  using common principal components for comparing GCM simulations, 816

western Pacific warm pool region sensitivity to convective triggering, 1553
w.r.t. CAPE variability overestimating climatic changes in GCM study, 1997
Geographical variations, low-cloud type over oceans from surface observations, seasonal variations, 383
Geopotential energy, convergence and disposal of energy and moisture over Antarctic polar cap, 1703
Glacial mass changes, climate variations and changes in mass of three glaciers, 2161
Global change, recent increasing trend in streamflow of rivers in South America, 2858
Global climate modeling, sensitivity of simulated climate to cloud liquid water diagnostic, 1497
Global climatology, high-resolution global SST climatology for the period 1961–90, 3320
Global energy balance, means and trends for shortwave irradiance from archive data, 2042
Global monthly precipitation, estimates from satellite-observed outgoing longwave radiation, 137
Global radiation, new monthly climatology of global radiation for the Arctic, 121
Global surveys, relationships of droplet size, cloud albedo, and liquid water path, 1516
Global vegetation distribution, intercomparison of global vegetation distribution and 6 kyr orbital forcing, 2721
Global warming
climate change and the middle atmosphere, ozone response to double CO_2, 895
role of ocean in the response of tropical climatology to global warming, 864
Great Lake cyclones, frequency and intensity of Great Lake cyclones, 61
Greenhouse effect
15-yr simulation of clear-sky effect using ECMWF reanalyses and with ERBE, 690
water vapor, surface temperature, and an analysis of tropical-mean data, 2686
Greenhouse forcing, sulfate aerosol indirect effect and carbon dioxide greenhouse forcing, 1673
Ground wetness, influence of SST and ground wetness on Asian summer monsoon, 3230
Hadley circulation, effects of cloud vertical structure on atmospherical circulation in GCMs, 3010
Heat flux, surface turbulent heat flux anomalies in the North Atlantic, 2310
Heat sources, seasonal and interannual variability of atmospheric moisture sinks and, 463
Hidden Markov model, hidden Markov model for rainfall using breakpoint data, 42
High-resolution climatology, high-resolution global SST climatologyfor the period 1961–90, 3320
Historical climatology, pre-1866 extentions of the Southern Oscillation index, 2325
Historical data, reconstruction of monthly mean 700-mb heights from surface data, 2136
Horizontal advection, horizontal advection of hydrometeors in single-column models, 2437
Humidity analysis, effects on climate records of changes in NWS humidity processing, 2424
Hurricane, synopsis of hurricane activity in North Atlantic, especially tropical-only variety, 2062
Hybrid coupled models, decadal variability in the North Pacific as simulated by, 297
Hydrologic processes, anomalous atmospheric hydrologic processes associated with ENSO, 800
Hydrologic–radiation feedback, anomalous atmospheric hydrologic processes associated with ENSO, 800
Ice clouds, study w.r.t. effective radius parameters for, 1793
Indian monsoon, interannual variations of rainfall in Godavari River Basin and ENSO, 768
Indian summer monsoon
interannual variations, external conditions versus internal feedbacks, 501
seasonal/interannual soil moisture variations in the former USSR and, 652
soil moisture variations in the former USSR and, 652
Indonesian throughflow, global climate system and, 676
Inhomogeneities, technique for identification of inhomgeneities in temperature series, 1094
Interactive, canopies for a climate model, 2823
Interannual variability
intercomparison of interannual variability of global 200-hPa circulation, 2505
modes of interannual and interdecadal variability of Pacific SST, 2556
north–south precipitation pasterns on interannual–decadal timescales, 3095
rainfall in Godavari River Basin and ENSO, 768
seasonal and interannual variations in stratiform and convective clouds, 2922
short-lead time prediction of summer rainfall in tropical North Africa, 3167
space–time structure of monsoon interannual variability, 3057, 3060
summer monsoons, cloud radiative forcing, 1883
U.S. summer precipitation, 2582
Intercomparison of bulk aerodynamic algorithms for sea surface fluxes, 2628
Interdecadal variability
dynamics of interdecadal variability in coupled ocean–atmosphere models, 602
interdecadal variations in marine low clouds, 2910
modes of interannual and interdecadal variability of Pacific SST, 2556
variability of the thermohaline circulation in the GFDL coupled model, 759
Intraseasonal oscillation, tropical influences on California precipitation, 412
Intraseasonal variability
high- and low-frequency intraseasonal variance of OLR, 968
mixed layer modeling in the tropical western Pacific and Indian Oceans, 2668
ISCCP fields, new monthly climatology of global radiation for the Arctic compared with, 121
Kelvin wave, Kelvin and Rossby wave contributions to the SST oscillation of ENSO, 2461
Laboratoire de Météorologie, sulfate aerosol indirect effect and carbon dioxide greenhouse forcing, 1673
Land surface alterations, coupled biosphere–atmosphere model forclimate change due to, 1749
Land surface model, coupled to the NCAR Community Climate Model version 3, 1307
Lightning deaths, changes in the number of lightning deaths in the United States, 2070
Linear inverse modeling, prediction of tropical Atlantic SST using linear inverse modeling, 483
Linear prediction, EOF-based linear prediction algorithm, 3046
Liquid water path, global survey of the relationships of droplet size, cloud albedo and, 1516
Local climate variations, statistical and model-based downscaling techniques for estimating, 735

Long range forecasting, Pacific and Atlantic SST related to northeast Brazil monthly precipitation, 551
Long-range predictability, ENSO effect on extreme rainfall/temperature frequencies in United States, 3192
Long-term forecasts, reproducible forced modes in AGCM ensemble integrations, 2942
Low-cloud type
  over ocean from sea surface observations, vertical profiles, 369
  over oceans from surface observations, seasonal variations, 383
Low clouds, role in summertime atmosphere–ocean interactions, 2482
Low-frequency variability
  characteristic of snowfall over the eastern half of the United States, 234
  wintertime in the North Pacific–American sector 1949–93, 1073
Madden–Julian oscillation
  coupled modes of the warm pool climate systems, air–sea interaction, 2116
  frictional moisture convergence in a composite life cycle of the, 2387
  influences on ocean surface heat fluxes and sea surface temperature, 1057
Marine low clouds, interdecadal variations, 2910
Marine stratus optical depth, inference of marine stratus cloud optical depths from satellite measurement, 215
Maximum temperature, recent trends in maximum and minimum temperature, 2147, 2150
Memory, seasonality of large-scale atmosphere–ocean interaction over North Pacific, 2473
Mesoscale, response to decadal variability in the American southwest, 3128
Mesoscale eddies, global ocean component of the NCAR Climate System Model, 1287
Meteorological statistics, changes in the number of lightning deaths in the United States, 2070
Microwave sounding
  reconciling surface and satellite microwave sounding records, 945
  merging procedures for the microwave sounding units daily temperature series, 2016
Mid-Holocene climate, simulations of mid-Holocene climate using an atmospheric GCM, 2607
Middle atmosphere, climate change and the middle atmosphere, double carbon dioxide, 876
Midtroposphere variability, relation with midlatitude SST variability, 1386
Minimum temperature, recent trends in maximum and minimum temperature trends, 2150
Mixed layer, modeling in the tropical western Pacific and Indian Oceans, 2668
Model assessments, decadal variability and trends in the tropical Pacific, 2273
Model characteristics
  hydrologic and thermodynamic characteristics of NCAR's CCM3, 1179
  National Center for Atmospheric Research Community Climate Model 3, 1131
  polar radiation budgets of the NCAR Community Climate Model version 3, 1246
Model comparison, comparison of the atmospheric circulation simulated by CCM3 and CSM1, 1327
Model domain, effect on summer precipitation simulations in a regional climate model, 2698
Model dynamics, West African monsoon dynamics and SST anomalies (1970–88), 1874
Model intercomparisons
  intercomparison of global vegetation distribution and 6-kyr orbital forcing, 2721
  intercomparison of interannual variability of global 200-hPa circulation, 2505
  simulations by general circulation models, signals, and systematic errors, 1538
  simulations of the annual cycle of precipitation over the United States, 1041
Model parameterization
  accurate parameterization of the IR radiative properties of cirrus cloud, 2223
  comparison of the CCM3 using diagnosed and predicted condensate, 1587
Model results compared, ENSO influence on intraseasonal extreme rainfall and temperature, 1575
Model sensitivity
  SST, soil moisture, and the stratospheric QBO, 1837
  simulated climate to cloud liquid water diagnostic, 1497
Model simulations
  comparison of the atmospheric circulation simulated by CCM3 and CSM1, 1327
  dynamical simulation of the NCAR Community Climate Model version 3, 1207
  relevance to climate change detection, 2743
Modeling, horizontal advection of hydrometors in single-column models, 2437
Moisture budgets, observed-mean annual cycle of moisture budgets over central United States, 2180
Moisture convergence, frictional moisture convergence in a composite life cycle of the MJO, 2387
Moisture sinks, seasonal and interannual variability of atmospheric heat sources and, 463
Momentum budget, CO_2- and aerosol-induced changes in vertically integrated zonal, 625
Monsoons
  Asian–Australian monsoon and ENSO in the NCAR Climate System Model, 1356
  evolution of the North American monsoon system, 2238
  influence of SST and ground wetness on Asian summer monsoon, 3230
  space–time structure of monsoon interannual variability, 3057, 3060
Monsoon climate, existence over South America, 1020
Monsoon variability
  model sensitivity to SST, soil moisture, and the stratospheric QBO, 1837
  variability of air–sea interactions over the Indian Ocean, 1859
  West African monsoon dynamics and SST anomalies (1970–88), 1874
Monthly teleconnections, observed nonlinearities between tropical Pacific SST and North American precipitation, 1812
Multidecadal, short-lead time prediction of summer rainfall in tropical North Africa, 3167
Multidecadal simulations, assessing potential seasonal predictability with GCM simulation, 109
Multidecadal timescales, variability of tropical ocean surface temperature, decadal–multidecadal, 2351
Navy models, western Pacific warm-pool region sensitivity to convective triggering, 1553
NCEP–NCAR reanalysis, new monthly climatology of globalradiation for the Arctic compared with, 121
Nested models, very high-resolution regional climate simulations, 3204
Neural network-extended EOF, neural network-extended EOF approach to forecasting ENSO events, 29
North American monsoon, evolution of the North American monsoon system, 2238
North Atlantic Oscillation, ENSO and North Atlantic Oscillation control of climate in Puerto Rico, 2713

North Pacific Ocean
role of low clouds in summertime atmosphere–ocean interactions, 2482
westward-intensified decadal change in North Pacific gyre-scale circulation, 3112
westward-intensified decadal change in North Pacific thermocline, 3112
Ocean circulation, destabilization of the thermohaline circulation by atmospheric transport, 1803
Ocean dynamics, incorporated in a simple coupled model to study decadal oscillations, 3309
Ocean energy transport, meridional ocean energy transport as simulated by the NCAR CCM3, 1237
Ocean GCMs, annual cycle of SST in the eastern tropical Pacific, in an ocean GCM, 777
Ocean models
application of a third-order upwind scheme in the NCAR ocean model, 1487
global ocean component of the NCAR Climate System Model, 1287
Ocean observations, low-cloud type over ocean from sea surface observations, vertical profiles, 369
Ocean response, role of ocean in the response of tropical climatology to global warming, 864
Ocean surface heat fluxes, Madden–Julian oscillation influences on sea surface temperature and, 1057
Ocean–atmosphere interactions
advective interaction, a stochastic model, decadal variability, 165
role of low clouds in summertime atmosphere–ocean interactions, 2482
Walker circulation and equatorial cold tongue, 189
Ocean–atmosphere models
dynamics of interdecadal variability in coupled ocean–atmosphere models, 602
simple coupled model developed to study decadal oscillations, 3309
used to examine decadal variability in ENSO predictability and prediction, 2804
Optical depth, optical depth of overcast cloud based on surface and satellite data, 2980
Optical thickness, temperature dependence of low-cloud optical thickness in the GISS GCM, 3268
Optimal regional averaging, optimal regional averaging method with error estimates and a test, 2340
Orbital forcing, intercomparison of global vegetation distribution and 6-kyr orbital forcing, 2721
Orography, influence of orography on extratropical response to El Niño events, 716
Oscillation of ENSO, Kelvin and Rossby wave contributions to the SST oscillation of ENSO, 2461
Outgoing longwave radiation
compared to divergence and rainfall in the Amazon Basin, 2898
global monthly precipitation estimates from satellite-observed radiation, 137
Overdispersion, phenomenon in stochastic modeling of precipitation, 591
Ozone response to double CO_2, climate change and the middle atmosphere, 895
Pacific warm pool, temperature regulation during TOGA COARE, 2297
Pacific–North American, role of transient disturbances in the pattern dynamics of, 523
Pack ice, temporal variability of the energy balance of thick Arctic pack ice, 313
Paleoclimatology, simulations of mid-Holocene climate using an atmospheric GCM, 2607
Parameterization
cloud overlapping and short-wave single-scattering properties, 202
observed mean annual cycle of moisture budgets over central United States, 2180
surface radiation budget over oceans and continents, 1951
Polar climate
sea ice and polar climate in the NCAR Climate System Model, 1472
simulation with the NCAR Community Climate Model version 3, 1270
w.r.t. energy and moisture transport over Antarctic polar cap, 1703
Precipitation
comparison of the NCEP–NCAR reanalysis with rain gauge and satellite data, 2960
decadal variability of precipitation over western North America, 3148
ENSO effect on extreme rainfall/temperature frequencies in United States, 3192
land–atmosphere interactions w.r.t. tropical deforestation, 1969
observed nonlinearities between tropical Pacific SST and North American precipitation, 1812
overdispersion phenomenon in stochastic modeling, 591
north–south precipitation pasterns on interannual–decadal timescales, 3095
Precipitation balance, model results and observational estimates of Arctic precipitation and, 72
Precipitation in GCMs, simulations of the annual cycle of precipitation over the United States, 1041
Prediction, EOF-based linear prediction algorithm, 3046
Principal mode analysis, characteristic of snowfall over the eastern half of the United States, 234
Quasi-Biennial Oscillation, model sensitivity to SST, soil moisture and the stratospheric QBO, 1837
Quasi-stationary waves, simulation in the Southern Hemisphere with the NCAR Climate System Model, 1405
Radiances from space, calibration of radiances from space, 754
Radiation
model versus AVHRR data w.r.t. cloud height, cloud fraction, outgoing radiation, 1976
w.r.t. study of SST and surface flux based on outgoing longwave radiation, 1685
Radiation budgets
influence of absorbing aerosols on the solar surface radiation budget, 5
polar radiation budgets of the NCAR Community Climate Model version 3, 1246
Radiative fluxes, biases in shortwave column absorption in the presence of fractal clouds, 431
Radiative forcing, GCMs used to simulate climate response to soil dust aerosols, 3247
Radiometer, AVHRR versus model obs w.r.t. cloud fraction/height and outgoing radiation, 1976
Radiosonde data, effects on climate records of changes in NWS humidity processing, 2424
Radiosonde temperature data, use of radiosonde temperature data in climate studies, 1002
Rainfall
and climate variation over a sloping New Mexico plateau, 292
compared to divergence and outgoing longwave radiation in the Amazon Basin, 2898
Rainfall model, hidden Markov model for rainfall using breakpoint data, 42
Rapid development, Rossby wave propagation and upper-levelanomalous anticyclones, 2491
Reanalysis
arctic cloud–radiation–temperature associations, 3030
seasonal and interannual variability of heat sources from NCEP–NCAR, 463

surface energy and water balance for the Arkansas–Red River basin, 2881
Regional climate data, optimal regional averaging method with error estimates and a test, 2340
Regional precipitation, decadal variability of precipitation over western North America, 3148
Regional simulations, very high-resolution regional climate simulations, 3204
Regular grid analysis, improved method for analyzing sparce and irregularly distributed data, 1717
Reverse specification, reconstruction of monthly mean 700-mb heights from surface data, 2136
River flow forecasts, response to precipitation and snow budgets in California, 2376
River flows
interannual and decadal cycles in river flows of southeastern South America, 2570
response to precipitation and snow budgets in California, 2376
Rossby wave
Kelvin and Rossby wave contributions to the SST oscillation of ENSO, 2461
propagation, Rossby wave propagation and upper-level anomalous anticyclones, 2491
Russian winters, changes in Russian snow accumulation 1936–83 and its spatial patterns, 856
Salinity, w.r.t. anomalies forced through freshwater fluxes and Ekman transport, 1906
Satellite climatology, reconciling surface and satellite microwave sounding records, 945
Satellite data
15-yr simulation of clear-sky effect using ECMWF reanalyses and with ERBE, 690
calibration of radiances from space, 754
comparison of the NCEP–NCAR reanalysis with rain gauge and satellite data, 2960
estimates from satellite-observed outgoing longwave radiation, 137
inference of marine stratus cloud optical depths from satellite measurement, 215
merging procedures for the microwave sounding units daily temperature series, 2016
optical depth of overcast cloud based on surface and satellite data, 2980
plane parallel albedo biases from satellite observations, 919, 933
reconciling surface and satellite microwave sounding records, 945
Satellite observations, variability of air–sea interactions over the Indian Ocean, 1859
Satellite radiometers
calibration of radiances from space, 754
plane parallel albedo biases from satellite observations, 919, 933
Sea ice
effect on the sensitivity of the thermohaline circulation, 2789
polar climate in the NCAR Climate System Model, 1472
Sea surface fluxes, intercomparison of bulk aerodynamic algorithms, 2628
Sea surface temperatures
Atlantic sea surface temperature and tropical cyclone formation, 578
effects of decadal SST anomalies on ENSO predictability and prediction, 2804
high-resolution global SST climatology for the period 1961–90, 3320
improved method for analyzing sparce and irregularly distributed data, 1717
Madden–Julian oscillation influences on ocean surface heat fluxes and, 1057
modes of interannual and interdecadal variability of Pacific SST, 2556
optimal regional averaging method with error estimates and a test, 2340
Pacific warm pool temperature regulation during TOGA COARE, 2297
prediction of tropical Atlantic SST using linear inverse modeling, 483
relation with atmospheric low-frequency variability, 1386
relationships between South American precipitation and SST, 251
seasonality of large scale atmosphere–ocean interaction over North Pacific, 2473
study of SST and heat flux in the central–eastern part of North Atlantic, 2310
used to study potential for ENSO predictability over the PNA region, 3295
w.r.t. development of tropical-only hurricanes in the North Atlantic, 2062
w.r.t. seasonal variability of flux and SST produced by MJO, 1685
Seasonal forecasts, interannual variations, external conditions versus internal feedbacks, 501
Seasonal predictability
annual cycle of PNA seasonal predictability associated with phases of ENSO, 3295
assessing potential seasonal predictability with GCM simulation, 109
Seasonal rainfall, simulated by regional climate model based on soil moisture initializations, 2698
Seasonal variations
low-cloud type over oceans from surface observations and geography, 383
reproducible forced modes in AGCM ensemble integrations, 2942
seasonal and interannual variations in stratiform and convective clouds, 2922
Semidiurnal variations, diurnal variations of surface wind over the tropical Pacific Ocean, 1730
Severe weather, changes in the number of lightning deaths in the United States, 2070
Shear components, 6-yr climatology for the Australian–South Pacific jet stream, 283
Shortwave column absorption, biases in shortwave column absorption in the presence of fractal clouds, 431
Shortwave irradiance, means and trends for shortwave irradiance from archive data, 2042
Signal detection, potential effect of GCM uncertainties on anthropogenic signal detection, 659
Simple climate models, analysis of timescales of response of a simple climate model, 97
Single-column models, importance of the horizontal advection of hydrometors in, 2437
Smoothing spline ANOVA, spatial-temporal analysis of temperature using smoothing spline ANOVA, 18
Snow accumulation, changes in Russian snow accumulation 1936–83 and its spatial patterns, 856
Snowfall, characteristic of snowfall over the eastern half of the United States, 234
Soil moisture
feedback on summer precipitation simulation in a regional climate model, 2698
seasonal/interannual variations in the former USSR, 652
Solar radiation
climate forcing by changing solar radiation, 3069
space–timescales of the surface solar radiation field, 88
Solar surface radiation, influence of absorbing aerosols on the solar surface radiation budget, 5
South America, interannual and decadal cycles in river flows of southeastern South America, 2570
South American climate, does a monsoon climate exist over South America?, 1020

South Pacific jet steam, 6-yr climatology for the Australian–South Pacific jet stream, 283
Southern Brazil, relationships between South American precipitation and SST, 251
Southern Oscillation
pre-1866 extentions of the Southern Oscillation index, 2325
using the Southern Oscillation to forecast wheat and sorghum crop yields, 54
Southwestern monsoon, interannual variability of the U.S. summer precipitation, 2582
Space–timescales, surface solar radiation field, 88
Sparce data analysis, improved method for analyzing sparce and irregularly distributed data, 1717
Spatial patterns, changes in Russian snow accumulation 1936–83 and its spatial patterns, 856
Spatial–temporal analysis, spatial–temporal analysis of temperature using smoothing spline ANOVA, 18
Spatial variability, spatial and temporal variability of Antarctic precipitation, 334
SST anomalies, West African monsoon dynamics and SST anomalies (1970–88), 1874
Stochastic models
advective ocean–atmosphere interaction, decadal variability, 165
overdispersion phenomenon in stochastic modeling of precipitation, 591
Stochastic simulations, time–frequency variability of ENSO and stochastic simulations, 2258
Storm tracks, frequency and intensity of Great Lake cyclones, 61
Stratospheric decadal wave
global range and its association with the sunspot cycle, 1529
global range and its association with the troposphere, 1529
Stratospheric oscillations, model sensitivity to SST, soil moisture and the stratospheric QBO, 1837
Streamflow, recent increasing trend in streamflow of rivers in South America, 2858
Subsystems, example of a simple, ordered subsystem of a complex chaotic system, 2453, 2455, 2460,
Sulfate aerosol, indirect effect and carbon dioxide greenhouse forcing, 1673
Summer monsoons, interannual variations, cloud radiative forcing, 1883
Summer precipitation, interannual variability in the U.S., 2582
Summer rainfall, short-lead time prediction of summer rainfall in tropical North Africa, 3167
Sunlight penetration, annual cycle of SST sensitivity to sunlight penetration, 1932
Sunspot cycle, global range of the stratospheric decadal wave and its association with, 1529
Surface
diurnal and semidiurnal variations over the tropical Pacific Ocean, 1730
effect of surface sublayer on surface skin temperature and fluxes, 537
space–timescales of the surface solar radiation field, 88
surface energy and water balance for the Arkansas–Red River basin, 2881
surface ocean fluxes and water-mass transformation rates in coupled model, 1420
surface radiation budget over oceans and continents, 1951
Surface air temperature, simulations by general circulation models, signals, and systematic errors, 1538
Surface energy balance, surface energy and water balance for the Arkansas–Red River basin, 2881
Surface flux
impact of surface flux variability on GCM-scale boundary layer, 2774
study of SST and flux variations produced by Madden–Julian oscillation, 1685
Surface forcing, impact of surface flux variability on GCM-scaleboundary layer, 2774
Teleconnections
ENSO and North Atlantic Oscillation control of climate in Puerto Rico, 2713
ENSO influences on agriculture in the southeastern United States, 404
influence of SST and ground wetness on Asian summer monsoon, 3230
soil moisture variations in the former USSR and the Indian summer monsoon, 652
tropical influences on California precipitation, 412
Temperature
detecting climate signals in the surface temperature record, 563
ENSO effect on extreme rainfall/temperature frequencies in United States, 3192
merging procedures for the microwave sounding units daily temperature series, 2016
reconciling surface and satellite microwave sounding records, 945
spatial-temporal analysis of temperature using smoothing spline ANOVA, 18
surface air temperature variations in the Amazon region, 1105
technique for identification of inhomgeneities in temperature series, 1094
temperature dependence of low-cloud optical thickness in the GISS GCM, 3268
Temporal variability, spatial and temporal variability of Antarctic precipitation, 334
Texas crop yields, using the Southern Oscillation to forecast wheat and sorghum crop yields, 54
Thermodynamics, land–atmosphere interactions w.r.t. tropical deforestation, 1969
Thermohaline circulation
destabilization by atmospheric transport, an analytic solution, 1803
generating low-frequency climate oscillation in North Atlantic/North Pacific, 1906
sea ice effect on the sensitivity of the thermohaline circulation, 2789
variability in the GFDL coupled model, 759
Thermohaline variability, effects of horizontal resolution and diffusion, 709
Thick Arctic pack ice, temporal variability of the energy balance of thick Arctic pack ice, 313
Timescales, analysis of timescales of response of a simple climate model, 97
Time–frequency variability, timefrequency variability of ENSO and stochastic simulations, 2258
Transient disturbances, role in the dynamics of the Pacific–North American Pattern, 523
Trend analysis, detecting climate signals in the surface temperature record, 563
Trend measurement, technique to measure trends in the frequency of discrete random events, 848
Tropical Atlantic, prediction of tropical Atlantic SST using linear inverse modeling, 483
Tropical atmosphere–ocean, generalized inversion of tropical atmosphere–ocean data, 1768
Tropical convection, precipitation regimes in the Western United States, 2404
Tropical cyclone formation, Atlantic sea surface temperature and, 578
Tropical deforestation, sensitivity of local climate to deforestation w.r.t. land–atmosphere interactions, 1969
Tropical forcing, empirical model of barotropic atmosphere dynamics, tropical forcing, 2645
Tropical hurricane, synopsis of hurricane activity in North Atlantic, especially tropical-only variety, 2062

Tropical-mean data, water vapor, surface temperature and an analysis of tropical-mean data, 2686
Tropical ocean temperatures, variability of tropical ocean surface temperature, decadal–multidecadal, 2351
Tropical Pacific Ocean, model assessment of decadal variability and trends in the tropical Pacific, 2273
Tropical Pacific warm pool, simulation with the NCAR Climate System Model, 1342
Tropical precipitation
  Pacific and Atlantic SST related to northeast Brazil monthly precipitation, 551
  tropical convection and precipitation regimes in the Western United States, 2404
Tropical regimes, tropical convection and precipitation regimes in the Western United States, 2404
U.S. drought 1988, Rossby wave propagation and upper-level anomalous anticyclones, 2491
Upper-air data
  effects on climate records of changes in NWS humidity processing, 2424
  reconstruction of monthly mean 700-mb heights from surface data, 2136
  use of radiosonde temperature data in climate studies, 1002
Upper atmosphere, intercomparison of interannual variability of global 200-hPa circulation, 2505
Upper-ocean feedback, Pacific warm pool temperature regulation during TOGA COARE, 2297
Upper-ocean layer, global ocean component of the NCAR Climate System Model, 1287
Uruguayan precipitation, relationships between South American precipitation and SST, 251
Variability
  space–time structure of monsoon interannual variability, 3057, 3060
  spatial and temporal variability of Antarctic precipitation, 334
Vegetation effects, role of vegetation in the dynamics of the West African monsoons, 2078
Vegetation, influence on mean monthly diurnal temperature and specific humidity cycles, 2995
Vertical mean components, 6-yr climatology for the Australian–South Pacific jet stream, 283
Vertical profiles, low-cloud type over ocean from sea surface observations and, 369
Vertical wind shear anomalies, Atlantic sea surface temperature and tropical cyclone formation, 578
Volcanic signals, simulations by general circulation models, signals, and systematic errors, 1538
Walker circulation, ocean–atmosphere interaction, Walker circulation, equatorial cold tongue, 189
Warm pool, coupled modes of the warm pool climate systems, air–sea interaction, 2116
Warm-season moisture transport, subseasonal variations in warm-season moisture transport and precipitation, 2530
Water-mass transformation rate, surface ocean fluxes and water-mass transformation rates in coupled model, 1420
Water vapor, water vapor, surface temperature and an analysis of tropical-mean data, 2686
Watershed models, river flow response to precipitation and snow budgets in California, 2376
West African monsoons, role of vegetation in the dynamics of the West African monsoons, 2078
Western North America, climate variations and changes in mass of three glaciers, 2161
Western U.S. climate, tropical convection and precipitation regimes in the Western United States, 2404
Wind-driven circulation, coupled and uncoupled ocean model of NCAR Climate System Model, 1442
Winter atmospheric circulation, relative impacts of snow and sea surface temperature anomalies on, 2837
Winter cyclone patterns, U.S. winter cyclone frequency patterns associated with three ENSO parameters, 2152
Zero-dimension models, analysis of timescales of response of a simple climate model, 97
